

## Integration

Integrate your systems - optimize your internal company processes and avoid double work and waste of time and resources.

Get expert advice on how to optimize your business processes with integration of the systems that you need now and in the future.

### What you get:

- Professional consultation on the field of integration between e-commerce and financial systems
- Tailor made decisions regarding your company's specific technological situation
- Access to expert knowledge about the technical possibilities on the field of integration between e-commerce and financial systems and the benefits to gain from it
- Total overview of all your possibilities in the field of resource optimization with internet technology and concerning your website

### Your advantages:

- Avoid double work and many manual processes in your company
- Optimize business processes of the company and minimize resource use
- Get vital data updated in real time on your website and e-shop (for example stock, delivery)
- Get your inventory updated automatically when sales are done on your website - and have new products ordered automatically
- Get your orders, invoices and accounting generated automatically from connecting e-shop and finance system
- Get automatically generated content on your website to minimize the resources spent at the update (text, products, prices, etc.)
- Create additional sales by data mining and integration
- Achieve more benefits by connecting your website with extranet and intranet solutions
